

For the improvement of the local society, join our Neighborhood Association!

Our city has various problems such as garbage disposal, traffic safety, juvenile delinquency prevention, older persons living alone, roads and parks improvement, fire, crime and disaster prevention. These are matters that cannot be solved by a person or a family alone. Therefore, it is important to work together in solving these problems. The Neighborhood Association's purpose is to handle these problems while building a better community to live in.

What is Neighborhood Association?

It is a resident organization that establishes and implements rules as the center of community in order to promote friendliness, improve living environment and develop the local community. Many households participate in Neighborhood Associations in Kani city. People of different ages work together voluntarily in various activities to create a better place to live.

Join the Neighborhood Association!

The neighborhood association is the closest organization to our daily lives, wherein you can interact with friendly people in your area. Please participate in activities in your area and make the place you live in, a safer and more secure community.

Kani City Neighborhood Joint Association (14 groups) consists of 134 Neighborhood Associations.

(as of April 2018)
